

LACADA BREWERY CO-OPERATIVE

BREWERY PLANT REQUIRED

This could be 400 litre, 1000 litre, or 2000 litre.

These vessels could be dairy tanks. They can be round, square, rectangular.

Hot Liquor Tank

304 grade stainless steel

(would need electrical elements fitted in by us)

Mash Tun

304 stainless steel

(would need to have a slotted 'false floor' fitted to hold the grain bed)

Kettle

304 stainless steel

(needs electrical elements added; a mesh false floor to act as hop strainer)

Heat Exchanger

A sealed unit comprising multiple copper plates; would have to buy new from a brewery supplier

Fermentation Vessels x2

304 stainless steel, preferably conical bottoms.

Can also use food grade polyethylene; some breweries source jam vessels.

Conditioning Tanks x2

304 stainless steel or food grade polyethylene

4 Head Bottle Filler

Manufactured by Vigo - vigoltd.com

Cold Tank

304 stainless steel
